

I CLAIM:

1. A digital camera comprising:
 - a camera housing,
 - an auxiliary lens, and

5 means for attaching said auxiliary lens to said camera housing.
2. The digital camera as claimed in claim 1, wherein said attaching means includes a bracket attachable to said camera housing, for supporting said auxiliary lens in front of an optical device of said camera housing.
- 10 3. The digital camera as claimed in claim 2, wherein said bracket includes a base plate attachable to said camera housing, and a panel extended from said base plate to support said auxiliary lens.
- 15 4. The digital camera as claimed in claim 3, wherein said camera housing includes a screw hole formed therein, said base plate includes an orifice formed therein, and a fastener is engageable through said orifice of said base plate, and engageable with said screw hole of said camera housing, to secure said bracket to said camera housing.
- 20 5. The digital camera as claimed in claim 4, wherein said fastener includes a retaining ring attached thereto, and engageable with said base plate, for anchoring said fastener to said base plate.
- 25 6. The digital camera as claimed in claim 5, wherein said fastener includes a stem extended therefrom, and a threaded portion formed on said stem and engageable with said screw hole of said camera housing, to secure said bracket to said camera housing, said retaining ring is engaged onto said stem of said fastener.
7. The digital camera as claimed in claim 4, wherein said

fastener includes a screw hole formed therein, for attaching to a tripod.

8. The digital camera as claimed in claim 3, wherein said bracket includes a pad disposed between said base plate and said 5 camera housing, to protect said camera housing.

9. The digital camera as claimed in claim 3, wherein said panel of said bracket includes an opening formed therein, and an inner thread formed therein for threading to said auxiliary lens.

10. The digital camera as claimed in claim 3 further comprising 10 a barrel attachable to said panel, to support said auxiliary lens.

11. The digital camera as claimed in claim 10, wherein said barrel includes an outer thread for attaching to said panel, and an inner thread for engaging with said auxiliary lens.

12. The digital camera as claimed in claim 11, wherein said 15 barrel includes an additional outer thread formed thereon for attaching to said panel at different position.
